

Covered Wave Heading

We are pleased to advise that to enhance the presentation of our wave curtains, we have introduced the option of a Covered Wave Heading.

By using an additional layer of fabric, we can cover the heading tape to deliver a curtain that is as beautiful on the reverse side as it is the front!

This option uses 170mm of additional fabric which impacts on the maximum drop possible for curtains without turning and joining. Also consider that the thickness of the heading will increase slightly and therefore the stack size. Please enquire at Silent Gliss.

The optional covered wave heading is available at an additional cost of £34 per m (of track).

Images are available to on our online image bank, password required - for access contact samshervill@silentgliss.co.uk.
